

# Moritz Nicola Kreis

moritz-kreis.de

## OBJECTIVE

Ambitious software developer with a focus on object-oriented programming, databases, and software architecture. Solid experience in C#/.NET and other modern technologies, acquired through personal projects and a degree as a state-certified business informatics specialist. Passionate about creating efficient, user-friendly applications and open to new tools and frameworks. Goal: to deliver high-quality software solutions that provide real value to users and contribute to business success.

## EDUCATION

|                                                                                                                                                     |                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|
